Image © Atelier Ernst Koslitsch

After a lengthy exhibition-, but not work-break, we are happy to show Ernst Koslitsch' new work in the exhibition „We have to move the island“ in the gallery *Raum mit Licht*.

Ernst Koslitsch

Born 1977 in Wagna (Austria)

Ernst Koslitsch studied Photography at the University of Applied Arts Vienna and Performative Art and Sculpture at the Academy of Fine Arts Vienna. He graduated 2010.

Ernst Koslitsch started with photography. For this he constructed models which he photographed. He was interested in the social dimension of living, the construction of images and the expandable photographic concept and its perception.

In 2017 he began to paint with the simplest of means and concentrated more intensively on drawing. His yellow wall sculptures have the collective term "Yellow-Universe". They are works made of yellow used Doka boards, which are used on construction sites. Between 2015 and 2019 he used them to create large three-dimensional wall sculptures. The content of his works is about perception, conspiracy, manipulation and deception. He also deals with fake news, UFOs and topics such as Star Trek and science fiction.

Koslitsch has been awarded the Emanuel und Sophie Fohn Stipendiums (2007/2008), an award from the Province of Styria, and the ECB Photo Award. Since 2001 he has been represented at several solo and group exhibitions.
